

Edison A. Modesto Jr.

Manila, Philippines | edisonmodesto22@gmail.com | +63 927 987 2019 | edisonmodesto.dev | github.com/EdisonModesto

PROFESSIONAL SUMMARY

Flutter developer with 5+ years shipping production cross-platform mobile apps in fintech, e-commerce, and enterprise environments. Deep expertise in Dart, Clean Architecture, BLoC state management, REST API integration, and Firebase backends. Proven track record owning the full development lifecycle — from architecture and feature development to CI/CD, automated testing, and App Store / Play Store deployment. Experienced working with distributed international teams across 5+ countries. Comfortable in fast-paced environments where product cycles are measured in months, not quarters.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Kotlin, Swift, Android SDK, iOS SDK

Architecture & Patterns: Clean Architecture, BLoC, Domain-Driven Design concepts, Repository Pattern, Dependency Injection

State Management: BLoC, Riverpod, Provider, GetX

Backend & APIs: REST APIs, Firebase (Auth, Firestore, Cloud Functions, Cloud Messaging, Crashlytics, Analytics), Supabase

Testing & Quality: Unit testing, integration testing, widget testing, Firebase Crashlytics, performance optimization

DevOps & CI/CD: GitHub Actions, GitLab CI, Azure DevOps, automated build pipelines, code review workflows

Tools & Platforms: Git, GitHub, GitLab, Postman, Google Play Console, App Store Connect

Practices: Agile/Scrum, Test-Driven Development, continuous delivery, UX/UI best practices

PROFESSIONAL EXPERIENCE

Flutter Developer

May 2025 – Present

Tripex PH

- Lead end-to-end mobile development as the sole Flutter engineer, building and shipping the company's cross-platform travel app on Android, iOS, and Huawei AppGallery.
- Architect the app using Clean Architecture with BLoC state management, ensuring testability and scalability as the product grows.
- Integrate REST APIs and Firebase services (Auth, Firestore, Cloud Messaging, Crashlytics) to power real-time booking features, user notifications, and error monitoring.
- Own the full release lifecycle — CI/CD pipeline setup, automated testing, app store submissions, and post-launch performance monitoring.
- Drive product decisions by collaborating with internal teams to prioritize enhancements based on user feedback and analytics data.

Mid Software Engineer

April 2024 – May 2025

Sandlot Technology Ventures Inc.

- Delivered production Flutter and FlutterFlow applications for multiple client engagements, shipping features on schedule across concurrent projects.

- Integrated REST APIs and Firebase backends, implementing real-time data sync, authentication flows, push notifications, and Crashlytics monitoring.
- Set up CI/CD pipelines and maintained clear technical documentation, improving delivery consistency and stakeholder alignment.

Junior Flutter Developer

July 2023 – April 2024

Prosperna Inc.

- Built and shipped multiple features for an e-commerce platform serving Philippine SMEs, working in 2-week Agile sprints.
- Integrated REST APIs, payment gateways, and push notifications, contributing to improved merchant engagement and retention.
- Implemented Firebase Analytics and Crashlytics to track user behavior and monitor app stability in production.
- Participated in daily code reviews and sprint planning, helping the team maintain code quality and hit delivery targets.

Flutter Lead Intern

August 2022 – November 2022

DevKinetics Inc.

- Led a team of 3 Flutter developer interns, overseeing code reviews, alignment meetings, and PR approvals to deliver a production mobile app.
- Managed the full development lifecycle from planning through launch, including Play Store listing configuration and metadata optimization.

Freelance Flutter Developer

2020 – 2023

Fiverr & Upwork — 20+ projects delivered across 5+ countries

- Developed and shipped custom mobile applications for international clients in healthcare, logistics, education, and social impact.
- Managed the full project lifecycle independently — from requirements gathering and architecture to deployment and post-launch support.
- Collaborated with clients across time zones (US, Europe, Asia-Pacific), building strong remote communication and delivery habits.
- Maintained a high client satisfaction rate through proactive communication, on-time delivery, and iterative refinement based on feedback.

Sole Proprietor

2023 – Present

Devstastic — SaaS product development

- Build and ship developer-focused SaaS products, handling everything from product ideation and architecture to deployment and user feedback loops.
- Implement CI/CD pipelines and automated testing to maintain code quality across multiple products as a one-person engineering team.

PROJECTS I HAVE WORKED ON

Sereno Planner

2024 – Present

Focus-driven productivity SaaS — Flutter, Supabase, AI scheduling

- Architected and shipped a cross-platform productivity app from concept to live product, handling time blocking, intelligent task scheduling, and burnout protection.
- Built the entire backend on Supabase (Auth, PostgreSQL, Edge Functions), implementing real-time sync across devices and AI-powered scheduling suggestions.

- Implemented complex state management with BLoC/Riverpod to handle concurrent timers, calendar integrations, and notification scheduling.
- Owned product strategy, UX design, and full deployment lifecycle as a solo founder/developer.

Prosperna Mobile

2023 – 2024

All-in-one e-commerce platform for Philippine MSMEs — Flutter, REST APIs, Firebase

- Developed core merchant-facing features including product catalog management, order tracking, payment gateway integration, and sales analytics dashboard.
- Integrated payment SDKs enabling SMEs to accept GCash, Maya, and card payments in-app — directly handling financial transactions and settlement flows.
- Set up Firebase Crashlytics and Analytics to monitor app health and track merchant engagement, leading to measurable improvements in session retention through data-driven UX iterations.

A.C.E. — Ace Dating & Friends

2023

Social platform for asexual dating and community — Flutter, Firebase

- Built a full-featured social dating app with real-time messaging, profile matching, and community forums tailored for the asexual community.
- Implemented Firebase Cloud Messaging for push notifications, Firestore for real-time chat, and Firebase Auth for secure identity management.

ActNow Mobile

2023

Sustainability gamification app — Flutter, Firebase, gamification systems

- Developed a mobile app that rewards users for eco-friendly actions, featuring achievement systems, leaderboards, and progress tracking.
- Designed gamification mechanics to drive user engagement and habit formation around sustainability.

A11Y

2022

Accessibility-focused movie streaming app — Flutter, Social Impact

- Built an inclusive media app with accessibility features for people with disabilities, including audio descriptions, subtitle customization, and voice navigation.
- Focused on WCAG-compliant UI design and assistive technology integration.

PharmaGo

2022

Pharmacy delivery app — Flutter, Healthcare, Delivery logistics

- Developed a pharmacy delivery platform with real-time order tracking, prescription upload, and delivery route optimization.
- Built order management and logistics workflows connecting pharmacies, drivers, and customers.

NVTours

2022

Tourism app for Nueva Vizcaya — Flutter, Maps, Local guides

- Created a tourist guide app with interactive maps, local recommendations, and itinerary planning for visitors in Nueva Vizcaya.
- Integrated mapping APIs and location-based services for real-time navigation and points of interest.

QCU Mobile

2022

Campus e-commerce app for Quezon City University — Flutter, Education, E-commerce

- Built a campus marketplace app enabling students to buy, sell, and trade goods within the university ecosystem.
- Implemented user authentication, product listings, and in-app messaging for peer-to-peer transactions.

SPEAKING & COMMUNITY

Resource Speaker — Colegio de San Juan de Letran

June 2025

- Gave a workshop showcasing the capabilities of cross-platform development using Flutter to students at Colegio de San Juan de Letran.

Resource Speaker — Pamantasan ng Lungsod ng Maynila (PLM)

June 2025

- Presented a session at PLM hosted by the College of Engineering titled "Software Engineering in Startups: Finding the Balance Between Speed and Stability."

Flutter Speaker — G-TECH SUMMIT 2025

February 2025

- Did a talk at G-TECH Summit 2025 hosted by GDG On Campus TUP, sharing an introduction on leveraging FlutterFlow in building cross-platform applications with ease.

Mobile Development Mentor — INNOLYMPICS 2024

December 2024

- Guided and provided insights to teams on how they can leverage new technologies in building mobile apps during Innolympics 2024 hosted by GDSC PLM.

Workshop Speaker — INNOLYMPICS 2024

December 2024

- Acted as a speaker in a workshop sharing knowledge in utilizing Flutter to the participants of Innolympics 2024 hosted by GDSC PLM.

Guest Speaker — Flutter PH

June 2024

- Did a talk at Flutter PH called "Helping farmers with an AI mobile app" that showcased the possibilities of utilizing Gemini alongside the Flutter Framework.

Guest Speaker — Flutter PH

February 2023

- Did a talk at Flutter PH called "Using Flutter in the freelance world" and taught people how they can start freelancing with the Flutter Framework.

CERTIFICATIONS

- ISC2 Certification in Cybersecurity (2022)

ACHIEVEMENTS

4th Place — FlutterFlow Hackfest: Impact Challenge

November 2024

- Got 4th place by developing a mobile app designed to promote waste reduction, combat overconsumption, and encourage resource sharing by enabling users to rent and lend everyday items with ease, fostering a more sustainable lifestyle.

8th Runner Up — NotJust Hack 2023 Hackathon

November 2023

- Got 8th place runner-up by developing a mobile app that helps local businesses increase their presence in their local community.
